Parlour, Pet Valu, Posies, and Shear Style. The draw will be on October 7th at Pet Valu.

Good luck, and thank you for supporting Home Again!!

Hunter's Corner

Look at Hunter (and ignore his crazed look) rocking his bandanna from the Think Turtle Conservation Initiative!!

Like many doggos, Hunter lives for his walks. His ears go up when he hears the word, and he often races to the door to have his collar put on. Rain or shine, hot or cold, he's there for the walk! Maybe there will be bunnies, or maybe he can bark at cyclists and the small grey car which is his mortal enemy (we always wonder what kind of nastiness was done to him with cars in his first life).

But when is it too hot to walk?

Keep a vigilant eye on your doggo. Dogs thermoregulate by panting, but it's not a terribly efficient method of regulation. Excessive panting is one sign of heat exhaustion as is rising body temperature, signs of lowered energy and a real unwillingness to walk. Remember that a dog's temperature is higher than his human's, and so air temperature feels hotter to them than to us.

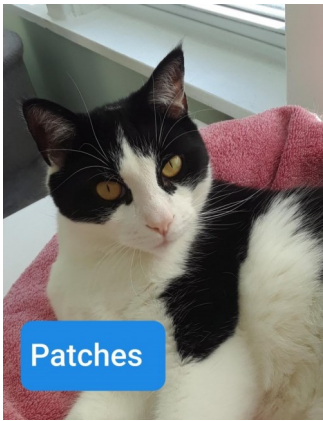

Depending on their breed, size and activity level, anything above about 80 degrees Fahrenheit or 24 Celsius has the potential to be unsafe in prolonged activity. This temperature range is made even worse in periods of high humidity when dogs are unable to cool themselves.

Remember that you must NEVER leave your dog in a car during summer months. The temperature can rise to dangerous levels in very little time even with windows open or the air conditioner on.

And help your dog cool down. Give him a cool place to lie down, in front of a fan or on a cooling mat. And always have water available, even in the car.

We're lucky in the region to have so many places for a dog to swim. Now if only Hunter would realize that the sprinkler is his friend!!

Cats and Kittens Available for Adoption!!

Meet Patches! Patches is a male, black and white, short haired kitty born in 2020.

Looking for a shadow? Patches will follow you around, assessing your activity and giving you a paws up. He is very curious in everything that his humans do.

He's brave around water, testing the water with his paw to make sure it's suitable for plant watering.

Patches is sweet and loving. He currently lives with a small dog and many other cats. Patches is neutered and the fee to adopt him is \$150

This beauty is Melissa, a long-haired female tabby born in 2019. Melissa was declawed before she came to Home Again.

Melissa is very shy and sweet. Once she is comfortable around you she loves her cuddles and chin scratches.

Melissa would do best in a quiet home, possibly with a senior. She is a beautiful girl who needs the comfort of a loving family.

Melissa is spayed and the fee to adopt her is \$150.

This is Asha, a short-haired female tortoiseshell who is two years old.

Asha loves her people! She is affectionate and friendly, but does need a home where she is the only feline—this queen needs an adoring public focused on her and her alone. Asha is spayed and the fee to adopt her is \$150.

Available Cat for Seniors

Jasper is a male, black, short-haired cat born in 2013.

Jasper is a total sweetheart. He loves to snooze the day away on your lap—you better not have other plans! He enjoys playing with his toys and comes running to see you when you call.

Jasper is mostly black with white patches on his neck and tummy. He lives with dogs, so would likely be fine in a family with a doggo.

Jasper has been neutered, microchipped and vaccinated. There is no cost to adopt Jasper, but please see the details of the Cats for Seniors program on our website, homeagainbancroft.ca.

Cats and Kittens Available for Adoption

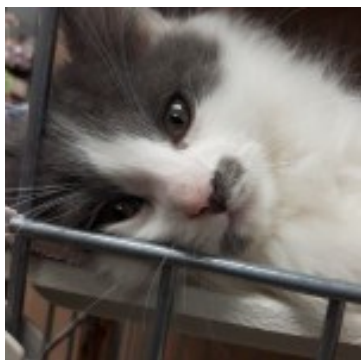

Stereotype cat in a box alert!!

This is Shelby, a white and Calico female short-haired young adult cat.

Shelby is sweet and lovable and loves attention. Do you have a box lying around? Hers!!! She loves to talk, and will ask you very sweetly for a nibble of anything you're eating!

Shelby was found with a dislocated hip. She has had the surgery to repair the damage, but will always likely have a bit of a limp. But don't feel sorry for this girl — the limp doesn't bother her at all and just adds to her mystery!

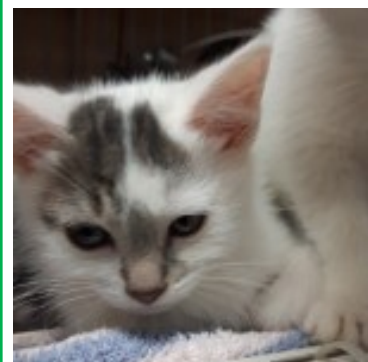

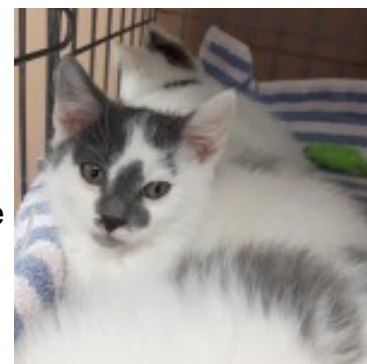

Shelby is looking for a loving caring home with humans who will adore her and keep her safe. She lives and loves the other animals in her home. Shelby has been spayed and the fee to adopt her is \$150.

Where are our kitten aficionados? These four no-name brothers were born on April 22nd, and are short haired with various blotches all over their kitten bodies.

Wouldn't you like to be the one to take one or more of them home? Name them something catchy like Thing One and Thing Two from Dr. Seuss or Frick and Frack? Watch them grow through silly kittenness to gangly teens to adult kitties?

These kittens are sweet and playful and have been making guest appearances at Pet Valu but are not yet adopted. The cost to adopt these boys is \$200 each and Home Again will arrange to have them neutered once they're old enough.

Nail Trimming at Pet Valu

Don't forget that on the first Wednesday of every month you can have your pet's nails clipped and trimmed at Pet Valu. All proceeds are donated by Pet Valu to Home Again. Remember that Home Again relies on the generosity of people such as you and of organizations such as Pet Valu. Each dollar we raise goes directly into rescuing another animal—we have no shelters, only fantastic fosters who look after rescued dogs and cats until they find their forever home. Thank you to each and every person who does what they can to help!

Dogs Available for Adoption

Daisy

"Daisy, Daisy, give me your answer do. I'm half crazy all for the love of you"!! Where is Daisy's partner?? Look at those ears!!! This is Daisy, the last of shepherd dogs who came to us in the spring, a 22 lb 4 month old Shepherd Cross.

Daisy is learning so much!! She makes great eye contact and is always looking for direction and attention. Because...Daisy is a huge, huge cuddlebug. She is easy to walk, almost housetrained, crate trained and sleeps through the night. Like all puppies she will need consistency and patience as she adjusts to her new home. Daisy will also need ongoing training and socialization.

Daisy has been vet checked and her vaccinations are up to date. Home Again offers an adoption fee rebate upon receipt of proof of spay when Daisy is old enough.

The adoption fee for Daisy is \$650.

Moxie

Meet Moxie!! Moxie is a female shepherd husky cross who is 6 months old and about 30 lbs.

Moxie is lovable and fun and exuberant!! Who is that new person—let me meet them!! Another dog?? I'm there!! Give me a ball and I'll throw it forever! Moxie would benefit from lots of exercise, a fenced yard and a kid to play with her.

Moxie follows basic commands, but she's still very much a puppy. The very occasional accident happens although not overnight, and she's still a little 'jump up' with people. She is still training, and needs more dedicated and consistent time to learn her new routines.

Moxie is also a snuggle pup and loves to cuddle with her humans and bestow the best kisses ever!

Moxie has been vet checked and her vaccinations are up to date. Home Again offers an adoption fee rebate upon receipt of proof of spay when Moxie is old enough. Her adoption fee is \$650.

Diamond

This is Diamond, a female Belgian Malinois/Boxer mix who is 1.5 years old and 37 lbs.

Diamond sparkles just like her name!! She is confident and friendly, great with children, adults, and other dogs. She is smart and energetic and would be a great hiking and camping companion, maybe even a dog for agility training!

Diamond is housetrained and crate trained, although she hasn't used one for ages. She could use a bit more training, particularly in leash skills as she does still tend to pull and occasionally jump.

Diamond would love a home with an active family and even another energetic dog! She has been spayed, microchipped and her vaccinations are up to date. The adoption fee for Diamond is \$600.

Dogs Available for Adoption

Meet Defawn, a female Belgian Malinois/Boxer who is 1.5 years old and 35 lbs. Defawn is a quiet, well-behaved young girl who is also exceptionally smart and loves to learn.

Defawn is gentle and a little shy with people at first. She loves children and other dogs, but has never met a cat. She is a joy to train and is eager to learn whatever she can!

Defawn is housetrained and has been crate trained but hasn't used one in ages. She has very good leash skills.

Defawn is Diamond's sister, and has really lived in the shadow of her confident sis. We feel she will blossom in a calm home either with or without children, and either with a happy dog or as an only dog.

Defawn has been spayed, microchipped, and her vaccinations are up to date. The adoption fee for Defawn is \$600.

At the Risk of Being Annoying about Car Temperatures

Dogs die in hot cars

Never leave your dog in a parked car on warm days.

- Cars act like a greenhouse and can heat up rapidly
- Thick fur and limited sweating means that dogs don't cool as well as us
- Dogs can quickly develop heatstroke and die in hot cars
