TICKETS CAN ALSO BE PURCHASED WITH CASH AT OVER 40 PARTICIPATING LOCAL  
STORES — LOOK FOR THE RAFFLE POSTER!!

## Hunter's Corner

It's the time of year when some of the days and evenings are getting colder, and

autumn is just over the horizon. It's also the time that Hunter, and many other dogs, experience seasonal allergies. Hunter has begun to scratch his ears and his paws and pretty much anywhere he may have come into contact with plants and vegetation.

Seasonal autumnal allergies are linked to the time when plants begin to dry and release their allergens into the air. These allergens are not only breathed in through the dog's snout, but can also settle in the fur and on the

skin of your dog or cat.

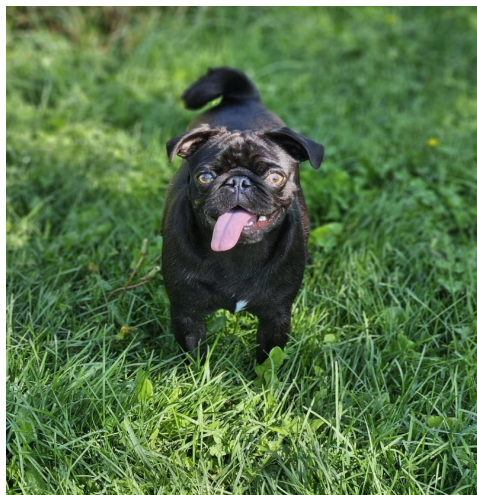

Seasonal allergies affect animals in different ways with different symptoms. With Hunter, we need to be careful that he doesn't develop "hot spots", which are typically red, inflamed areas of the skin, and are often a result of persistent scratching and biting. They appear irritated, and can be raised and often painful. It's our goal to make sure that Hunter's allergies are addressed before they can progress past the annoyance stage.

There are a few things you can do to minimize the impact of seasonal pollen:

- ⇒ Pollen levels are usually highest in the early morning and late afternoon. It may be helpful to change the time at which you walk your dog.
- ⇒ After a walk, do a quick wipe-down of your dog to remove anything that's settled. You can use a hypoallergenic wipe or a wet towel to remove the allergens. Pay particular attention to your dog's paws, especially if they've been in underbrush at all.
- ⇒ There are some supplements which may relieve irritation such as fish or coconut oil or a fatty acid like Omega-3 or Omega-6 oil. Check with your vet to see if one of these supplements might be helpful for your dog.
- ⇒ There are medications such as antihistamines or allergy shots which may be helpful if your dog's allergies are severe. Again, check with your vet.

Remember that seasonal allergies should disappear after a series of evening frosts. But that means winter is coming and we're just not ready yet for snow and ice!!

## New Adoptable Dogs

Meet **Jolene**, aka Little Joe, who is an 8 month old, 18 pound female pug.

Jolene wants nothing more than to be with her people. She has been described as the “sweetest companion”, travels well in the car, and will happily trot beside you on her leash. As a bonus, Jolene loves dogs, cats and children.

Jolene is crate trained and sleeps well through the night. She is still learning about house training, but is almost there!

This sweetheart of a pug loves life and wants to bond with her own family. She will be an exceptional companion.

Jolene has been spayed, her vaccinations are up to date, and she has a microchip. The adoption fee for Jolene is \$650.

**Betty** the Beauty is a female Labrador/Mastiff who is 2 years old and 85 pounds.

This good-natured, genuinely sweet dog ended up at animal control and her people did not come forward to claim her. She is one of the lucky ones, and we're happy to help her become someone's treasured family dog.

Betty likes other dogs and adapts depending on the other dog's personality. She is happy and confident, and her sweet disposition made it easy to find a foster home. She has not been cat tested.

Betty is smart and easy. She is house trained and crate trained. She loves car rides, and going on walks or hikes. She's not leash-perfect yet, but just give her a bit of time!! Betty's love for treats makes her a snap to teach.

Betty has the qualities that will make her a loyal and lovely companion, creating a beautiful bond with her people. She will be totally devoted to you!!!

Betty has been spayed, her vaccinations are up to date, and she has a microchip. The adoption fee for Betty is \$600.

Meet **Max**, a Saint Bernard cross who was born in May 2024, 20 pounds, and growing like crazy!

Max is such a sweet puppy. He has adapted to people and animals and is just a sweet cuddly ball of delight! Max is playful and energetic and even a bit mischievous but always adorable!

Progress is being made with house training, but further training is required. Max loves to go on walks, and he will let you know if someone is at the door!! He is amused by his toys, and enjoys being outside as much as possible. He will be a fantastic addition to anyone with the space for the large dog that Max will become.

Max's vaccinations are up to date, and he has a microchip. The adoption fee for Max is \$650, and there will be \$100 rebate upon proof that Max has been neutered at 6 months or when your vet advises.

## New Adoptable Dogs

Meet **Raina** and **Bella**, female Chihuahua/Dachshund crosses who are bonded and 4 years old. These sweet little sisters have never been apart from each other and must be adopted together.

Raina and Bella are playful girls who have lived happily with other dogs. They are house trained, but more reliable when crated than when they are left alone. They are happy to be crated together at night.

These pups are gentle little dogs who will enjoy the company of dog-savvy children. They are currently being fed Royal Canin gastrointestinal medium calorie dog food.

The adoption fee for each dog is \$450, they have been spayed, their vaccinations are up to date and they each have been microchipped.

Meet our country charmer **Ava**! Ava started life on a farm with her livestock guarding parents, but she also enjoys the benefits of being a companion pup!! She has the makings to be either, or both!

Ava is calm, respectful and sometimes a little shy with adults. But she LOVES children! No matter who the human, she finds her comfort zone quickly.

Ava is also respectful and submissive when meeting other dogs, watching for cues but naturally polite. A big brother or sister to show her the ropes would be a perfect match!

When Ava connects with her people her confidence blossoms. She is fun-loving, playful and affectionate and loves being outside, going for walks, swimming and helping with chores. She will be a great farm and family dog.

Ava's vaccinations are up to date, and she has a microchip. The adoption fee for Ava is \$650, and there will be \$100 rebate upon proof that she has been neutered at 6 months or when your vet advises.

This is **Daisy**, a female Spaniel/Blue Tick cross who is 8 weeks old and 11 lbs.

Daisy is happy and playful who at one time is tripping over her too-long legs and then the next minute standing still in a perfect hunting pose.

Daisy would love a dog to play with—she tries and tries to get the older dog in the foster home to play to no avail. Then she is off and exploring in the next moment!! And she sleeps really well — 7 hours overnight!!

She is a smart little pup who should be easy to trained. Like all puppies, Daisy needs lots of consistent training, love and play time to make her the bestest she can be!!

Daisy's vaccinations are up to date, and she has a microchip. The adoption fee for Daisy is \$650, and there will be \$100 rebate upon proof that she has been neutered at 6 months or when your vet advises.

**Don't forget to check out our website, [homeagainbancroft.ca](http://homeagainbancroft.ca) to see the other dogs we have in foster patiently waiting for their forever homes!**

## Available Kittens for Adoption

Meet our precious little mite **Terra**. Terra is a female kitten who is grey with white long hair who was born on May 26th.

Look at those whiskers!!! Terra is tiny, cute, friendly and loving. She is looking for her forever home.

This keeps happening. How heavy are cats?
